Before using the product, please carefully read this User Manual to guarantee correct usage and keep it securely for future reference.

Initial Remarks

This product is compatible exclusively with vehicles that have factory-installed wired CarPlay. For details on verifying whether your car is equipped with Apple CarPlay, please contact us.

Attention:

Not every car model with factory-integrated CarPlay is compatible with this adapter. Should you encounter any issues while using this product, we encourage you to reach out to us for assistance.

1. Determining if Your Car Has a Wired CarPlay System

This CarPlay Al box is compatible solely with vehicles from the year 2016 onwards that come with the original wired CarPlay installed. We recommend confirming whether your car supports the original wired CarPlay before making a purchase. To verify if your vehicle is equipped with the original CarPlay, please use one of the following methods

1.1 Look for a CarPlay icon within your car's audio system interface.

1.2 Connect your iPhone to the car's USB port using the original factory cable. If the "Use CarPlay" notification appears on your iPhone, this indicates that your vehicle is equipped with CarPlay functionality.

while phone is locked?

Your contacts and other information will appear on this car's display without unlocking your iPhone.

Allow CarPlay with "

Not Now Allow

1.3 You may seek confirmation from your car dealer.

Schematic View of Device

Note:

Ensure that the power is switched off before inserting the SIM card. For instructions on card insertion, please see the schematic view of the device. Note that the standard SIM card and Micro SD card are not included with the purchase.

Connection Method

Reminder:

This system is compatible exclusively with car models that have factory -installed wired CarPlay

Connect the vehicle's USB port to the CarPlay USB port using the USB cable. The indicator light will activate and remain turned ON (the process takes about 20 seconds).

If this is your first time connecting, it may be necessary to restart the engine to properly adjust the resolution settings of the vehicle's system.

Android Mirror:

1 . Download "carbitlink" on mobile phone.

2. Turn on the mobile hotspot, sharing wifi to your car and connect.

3. Click "carbitlink" on the car screen and click "carbitlink" on the phone.

4. Device pairing ("Carbitlink") will automatically pop up on the phone. Select Yes to complete the connection and select Mirror to complete the screen casting.

IOS Mirror:

1. Turn on the mobile hotspot, sharing wifi to your car and connect.

2 . Click the "carbitlink" on the car screen, open screen mirror on your iPhone, find and pair Carbit , and complete the screen mirroring.

Setting Up the SIM Card Network

Normally, there's no need to modify the data network settings. If you're experiencing network signal issues and cannot use mobile data for internet browsing, navigate to Settings > Network & Internet > Mobile Network > Advanced > Access Point Names. Select an alternative APN or create a new one that corresponds to your cell phone's network operator.

Using the Mini HDMI Output Terminal

Preview

Enable the HDMI feature in the settings. Turn ON the device and wait for 20 seconds, then connect the HDMI cable to mirror the screen onto an external display.

FAO

- 1. If the device does not connect to the vehicle even when the engine is on, disconnect the cable from the device and reset the connection.
- 2. If you cannot connect Wireless CarPlay with your phone, ensure that Bluetooth is active on your smartphone. If the issue persists, forget the Bluetooth connection on your phone and attempt to reconnect. Be aware that if multiple devices are paired, Bluetooth may not be recognized.

- 3. If the SD card is not recognized, reinsert or format the SD card; if the SD card is damaged, replace it with a new one.
- 4. If the device is not connecting, remove the connection record on the vehicle side and attempt to reconnect.
- 5. Should you encounter issues such as the distorted screen or frequent blackouts, please contact us for guidance or seek professional assisstance.
- 6. Regarding Wi-Fi settings: The AlBox is not a standalone device and does not provide network support on its own. You must connect it to your smartphone's Hotspot or car's Wi-Fi before use. To connect the phone to car using hotspot proceed by navigating to 'Settings' > 'Internet Sharing' on your phone. Enable 'Allow others to connect.' Then, set your WLAN password. This will be used to connect to "Al BOX".

Carplay AlBox Connection to Wi-Fi: From the system screen, access 'Settings', select 'Network and Internet', then activate Wi-Fi in 'Network and Internet'. Choose the Hotspot or wireless network you have prepared and input the password to establish a connection.

7. Dual Screen Display Instructions (Using YouTube and Google Maps as examples): Begin by opening YouTube, click on the home screen, and when the floating icon appears, click on it and choose the split-screen con. Subsequently, open Google Maps to divide YouTube and Google Maps into two distinct views, left and right.

Warranty

Products that you buy directly from our **Porodo** website or shop come with a 24-month warranty.

When you buy **Porodo** products from any of our approved sellers, you only get a 12-month warranty. If you want to extend this warranty, go to our website at **https://porodo.net/warranty** and fill out the form with your information. Don't forget to upload a picture of the product too. After we've checked and accepted your request, we'll send you an email to confirm that your product's warranty has been extended.
